

i3 Reference Card

<http://i3wm.org/docs/userguide.html>

Throughout this guide, the i3 logo will be used to refer to the configured modifier. This is the **Alt** key (Mod1) by default, with **⌘** (Mod4) being a popular alternative.

Basics

- + **Enter** open new terminal
- + **j** focus left
- + **k** focus down
- + **l** focus up
- + **;** focus right
- + **a** focus parent
- + **Space** toggle focus mode

Moving windows

- + **Shift** + **j** move window left
- + **Shift** + **k** move window down
- + **Shift** + **l** move window up
- + **Shift** + **;** move window right

Modifying windows

- + **f** toggle fullscreen
- + **v** split a window vertically
- + **h** split a window horizontally
- + **r** resize mode

Look at the "Resizing containers / windows" section of the user guide.

Changing the container layout

- + **e** default
- + **s** stacking
- + **w** tabbed

Floating

- + **Shift** + **Space** toggle floating
- + **Left click** drag floating

Using workspaces

- + **0-9** switch to another workspace
- + **Shift** + **0-9** move a window to another workspace

Opening applications / Closing windows

- + **d** open application launcher (dmenu)
- + **Shift** + **q** kill a window

Restart / Exit

- + **Shift** + **c** reload the configuration file
- + **Shift** + **r** restart i3 inplace
- + **Shift** + **e** exit i3
